

Cut carefully along the circle.

Cut out the black squares leaving a notch through which you can see.

Carefully cut out the entire interior black circle so it will glue into a clear jewel box.

Glue on the inside of jewel box, under the CD, with the print facing outside.

Using the solfege syllables, this wheel will calculate all modes except melodic and harmonic minor.

Cut carefully along the outside of the yellow circle.

It is designed to be exactly the size of a standard CD.

Glue the wheel to either side of an unneeded CD being careful to center it.

Very carefully, completely cut out the black circle so that the CD will fit into the jewel box and spin freely.
