RE: Eagle Scout Project at Clay Pit Pond

The Select Board was approached with an Eagle Scout project to add a kiosk at Clay Pit Pond. After reviewing the location, it is believed to be property under the purview of the School Committee.

The information from the scout is included here for your review and vote. The Select Board and Conservation Commission support the project and the Commission has provided the following information:

They envision an educational component to the kiosk to support research for the High School AP Biology class.

The Veteran's group has expressed an interest in posting on a second face of the Board. They would like to raise public awareness of Belmont's military connections and contributions.

The third face of the kiosk will likely be filled by the Commission, with initial information on the recently revived Ruth Ippen Tree Walk, located on the south side of the Pond.
